THE SUITE
join the future

WHAT IS SUITE?

The new generation of Loyalty Systems based on Blockchain. Suite is a platform where it's gonna be possible to gather points from adherent shops without the necessity of having multiple cards and with which is gonna be possible receive objects, request gift cards of the main online services (Amazon, Playstation etc), pay medical bills(national health dentists) or even request the conversion of Fiat points and transfer them on one's own bank account by wire transfer.

The loyalty market at the moment is made up of 2.16 billion dollars not exploited and is expected a growth up to 6.9 billion dollars in 2023 .

PLATFORM

Through STK token and SCT credits, we offer to the business owners stability, security and the comfort of the digital Loyalty Program.
SCT is going to have a fixed value in time and represents the "loyalty point" that through APP is going to be accredited from the owner of the commercial business to the customer and from the latter it can be spent at all the commercial businesses adherent and on the FidelitySuite platform for the purchase of services or a cashback request.

THE STK TOKEN

It's going to serve for:
- Monthly distribution of an amount of credits to the owners in proportion to the amount of STK owned and blocked on the platform.
- Gain a VIP status to have access to exclusive discounts (up to 50%) in the commercial businesses purchased from Suite.
- Discounts for purchasing products/services on the platform.
- Free tickets for periodic extractions and also for the chance of taking part at VIP extractions.

Additionally users are going to be able to purchase products/services even with other crypto-currency that will be in part automatically converted in STK through API, increasing in this way the use of STK. A percentage of STK will be burnt with every purchase and extraction on the platform making more exclusive the token's possession and reducing the supply.
